**Hill's Veterinary Nutritional
Advisor Certificate**

Completed in March 2023

PROFILE

I am a passionate creative person currently working in retail and I am attempting to make a career change to the world of web development. My ideal environment to learn and grow in would be front-end but I am also very interested in UX/UI.

PROJECTS

The Song Series

This is a set of three static webpages made with vanilla CSS that are each inspired by one of my favourite songs. My intention with this project was to practice the mobile first approach to creating responsive websites.

Portfolio

This is my portfolio webpage built using HTML, CSS and Javascript. My plan was to use a very minimalist design and colour scheme with a little touch of bright green.

WORK EXPERIENCE

Sales Assistant

About Cats and Dogs

2020 - Present

- I have been running the Burgundy branch since it opened in October 2020.
- I handle all orders, invoicing, returns, stock control, supplier relations and store administration.
- I provide my clients with pet care advice in the areas of nutrition, training, basic health issues and parasite control.
- Many customers have given me positive feedback as they are pleased by my caring attitude and efficiency in handling special orders or requests.
- I am constantly broadening my product knowledge to stay up to date with the best recommendations to give each individual.
- My crisis management skills were proven when the shop experienced a major water leak and became flooded. I had to simultaneously protect all the stock while also liaising with the owner and the construction site manager to ensure the problem was solved.
